Full Stack E-Commerce Shopping App

Problem Statement: Develop an application for a shopping app where you can add and filter products by category

Solution: Created a Responsive Full Stack Website having the following features:
1. Login & Signup
2. Shopping Page
3. Cart Page
4. Checkout Page
5. Filter Products according to category
6. Search Products
7. Adding Products to the cart
8. Deleting Products

Link to the website(Deployed on Netlify): Click here

Tech Stack:
1. React.JS
2. Firebase
3. Redux Toolkit
4. Netlify
